

About PHARMALTO

Pharmalto is a ground-breaking SaaS company providing a patent pending Mobile Health Engagement solution for individuals, healthcare providers and First Responders. Pharmalto's mobile solution improves participation and engagement in Health and Wellness Programs, improves the health and welfare of patients and accelerates assessment and emergency treatment ultimately leading to a healthier, happier and more productive lifestyle. Central to the inspiration and design is Charles E Neagle III, M.D. The company is based in Plano, Texas.

"An individual who engages in their health, saves money and becomes happier, healthier and more productive" ^{i ii}

About Charles E. Neagle III, M.D.

Charles E. Neagle III, M.D. received his B.S. in Biomedical Engineering with Magna Cum Laude honors and Tau Beta Pi honorary election from Vanderbilt University. This curriculum focused on the application of engineering principles to biological processes and required strong problem solving and analytical skills.

Dr. Neagle earned his M.D. at The University of Maryland Medical School with Magna Cum Laude honors and Alpha Omega Alpha honorary election. Always interested in the application of engineering principles to treat medical pathology, an Orthopedic Residency was completed at the University of Pennsylvania and a Hand and Upper Extremity Fellowship at the Baylor College of Medicine. Dr. Neagle continues to practice Hand Surgery in the North Texas area.

Frustrated by the tremendous waste in healthcare spending and puzzled by the frequent lack of patient engagement and understanding of their health, Dr. Neagle applied the quantification of engineering to create the Pharmalto Mobile Health Engagement solution designed to engage, empower and connect the individual consumer to their health and well-being.

"This is the future of medicine."

Pharmalto® - “Be Healthy for You - And Those You Love”

Pharmalto Mobile Health Engagement™ is a cutting-edge software solution designed to help you and your loved ones better engage in your health. Pharmalto’s patent pending mobile solution encourages you to become involved, learn about your health and use this information to improve your health, well-being and quality of life. You can also make your health record available to your doctors and emergency workers.

Medicine-Vault® is a mobile app for interactive health and wellness management. This health record is available 24x7 and is owned by you. You control who can view your information. If you don't use phone applications, a family member or trusted friend can be connected to your account to help manage it. The mobile app does the following:

- ✓ Creates personal, lifelong health history in a HIPPA compliant cloud including medications, supplements, nutrition, exercise and biometric information
- ✓ Lets you set reminders for taking medications and supplements so you never forget
- ✓ Records allergies, side effects and ineffective medications to prevent issues with newly prescribed medications
- ✓ Leverages iHealth™ and Fitbit® to automatically populate your health information
- ✓ Collects exercise and food information (steps, miles, weight, calories, etc.) to ensure you're following your diet and health goals

PharmaltoID® is a mobile app for First Responders linking them to your personal health record. The mobile app does the following:

- ✓ Lets First Responders scan your wearable tag to view all of your relevant health information in your health cloud including medicines, allergies, health issues, compliance and medical history
- ✓ Helps First Responder accelerate assessment and treatment of your health emergency
- ✓ Keeps critical information up-to-date and available to First Responders when treating you in an emergency
- ✓ Helps save lives, so keep your tag accessible, wear it as a necklace/bracelet or keep in an envelope on your refrigerator

MedLife® is a web-based application connecting your Medicine-Vault to your Healthcare Provider for everyday Telehealth. The application does the following:

- ✓ Automatically loads your medicine history into your personal health cloud for easy access
- ✓ Daily screening or self-reporting of medication adherence, health sensor, activity and nutritional data presents timely actionable data to provider
- ✓ Connection to your provider improves your health and lets you control which providers have access
- ✓ Sends notifications to provider allowing preemptive intervention to improve your health and welfare, saves them money and avoids hospital readmission

To get the most out of life and be the healthiest you can be means that you should:

- Follow your nutrition and nutrients
- Exercise as recommended by your healthcare provider
- Note allergies, side effects and ineffective medications and supplements
- Take medication and supplements as directed
- Look for potential interactions between your medications and supplements
- Check your biometrics (weight, blood pressure, etc.)
- Use Pharmalto Medicine-Vault to have a life-long, mobile history of your health 24x7
- Connect your Medicine-Vault, HIPPA compliant health cloud to your healthcare provider to have a continuous connection to their treatment plan
- Use Pharmalto to assist First Responders if you ever have a medical emergency

And start enjoying a healthier, happier and more productive lifestyle!

The only Mobile, Interactive Health and Wellness Program engagement solution—*Designed by a physician with your health and safety in mind*—All at your fingertips 24x7 ⁱⁱⁱ
